

Newton Bridge Fund

Second quarter 2009

Fund information

Aim

To achieve capital growth over the long term through a portfolio that is predominantly invested in equities, across a wide range of industries and countries. The equity element is balanced by cash, bonds and exposure to alternative assets, such as hedge funds, to reduce the overall volatility of the portfolio.

The fund is managed in line with the Newton Private Investment Management Growth Model. The central asset allocation for the model is 70% invested in global equities and 30% invested in other asset classes which may include bonds, cash, hedge funds, structured products and property.

Newton Bridge Fund	16.8%	18.6%	16.5%	1.0%	-20.0%

All performance sourced from: Lipper, WM, ARC & Datastream, as at 30 June 2009. Calculation basis: Sterling, total return, bid to bid, without initial charges, net income reinvested, net of management fees.

Risk factors

This is a financial promotion and is not intended as investment advice. Past performance is not a guide to future returns. The value of investments and the income from them can fall as well as rise and investors may not get back the original amount invested. The value of overseas securities will be influenced by fluctuations in exchange rates. If the portfolio invests in sub-investment grade bonds that typically have a low credit rating these carry a high degree of default risk, which can affect the capital value of your investment. If the portfolio has exposure to hedge funds, gold, private equity and property via publicly quoted transferable securities, there are additional risks associated with these sectors.

Newton's themes

Newton is a global thematic stock picking company. Our style is team oriented and relies on effective communication between all of our investment personnel. Two of our themes are listed below, along with examples of individual holdings.

All Change

Factors

The previously benign period of stable growth, low inflation, and easy credit, which allowed private sector debt and financial leverage to grow to unsustainable levels (as described in a previous theme, "Becalmed") has come to an end. When assessing investments we assume that access to credit will remain difficult, which favours companies with limited financing requirements and argues against exposure to highly-indebted customers.

Investments

Barrick Gold, Centrica, Cobham, Microsoft, Nestle, Novartis, Short dated corporate bonds

Networked World

Factors

Communications networks have already transformed our lives, but there is great scope for further expansion. Rapid increases in bandwidth continue to increase networks' potential, and this is driving productivity gains. The explosive growth of mobile internet, combined with innovations in sensor technology, will generate profound changes in many industries.

Investments

Cisco, Deutsche Telekom, Millicom, Tele Norte Leste, Verisign, Vodafone
