

Newton Offshore Strategy Fund Alternative

Assets

Third quarter 2009

Fund information

Aim

To achieve long-term growth in excess of cash returns from a balanced portfolio of Alternative Assets. The Fund is intended to have significantly lower absolute volatility than traditional equity biased funds, but will exhibit volatility relative to its benchmark.

To	30/09/05	30/09/06	30/09/07	30/09/08	30/09/09
NOSF Alternative Assets	-	-	-	-	-4.0%

All performance sourced from: Lipper, ARC & Datastream, as at 30 September 2009. Calculation basis: Sterling, total return, bid to bid, without initial charges, gross income reinvested, net of management fees. Care should be taken when extrapolating these figures due to short performance history.

Risk factors

This is a financial promotion and is not intended as investment advice. Past performance is not a guide to future returns. The value of investments and the income from them can fall as well as rise and investors may not get back the original amount invested. The value of overseas securities will be influenced by fluctuations in exchange rates. If the portfolio invests in sub-investment grade bonds that typically have a low credit rating these carry a high degree of default risk, which can affect the capital value of your investment. If the portfolio has exposure to hedge funds, gold, private equity and property via publicly quoted transferable securities, there are additional risks associated with these sectors.
