All performance sourced from: Lipper, Datastream & Bloomberg, as at 31 December 2011. Calculation basis: Sterling, total return, bid to bid, without initial charges, gross income reinvested, net of management fees.

*The benchmark is 1 month £ Libor +2% p.a. (from 1 January 2010; it was previously 25% ML GBM Corporates, 25% JPM WGBI, 25% ML GHY Constrained, 25% ML Global Emerging Sovereigns - all Hedged into £).

Risk factors

This is a financial promotion and is not intended as investment advice. Past performance is not a guide to future returns. The value of investments and the income from them can fall as well as rise and investors may not get back the original amount invested. The value of overseas securities will be influenced by fluctuations in exchange rates. If the portfolio invests in sub-investment grade bonds that typically have a low credit rating these carry a high degree of default risk, which can affect the capital value of your investment. If the portfolio has exposure to hedge funds, gold, private equity and property via publicly quoted transferable securities, there are additional risks associated with these sectors.

Long-term performance - risk and reward

Fund return and volatility since launch

This chart shows both return and volatility. The NOSF Global Fixed Interest Fund has given a higher return than the benchmark with very similar volatility. The launch date of the fund was 22 April 2004.

Performance sourced from: Lipper, Datastream & Bloomberg, as at 31 December 2011. Calculation basis: Sterling, total return, bid to bid, without initial charges, gross income reinvested, net of management fees.

*The benchmark is 1 month £ Libor +2% p.a. (from 1 January 2010; it was previously 25% ML GBM Corporates, 25% JPM WGBI, 25% ML GHY Constrained, 25% ML Global Emerging Sovereigns - all Hedged into £).
